

108 HDD

CUTTING WIDTH	AUGER	FAN	WEIGHT (LBS)
9'D	20X20"	36X12"	2050

Our heavy-duty 9' double auger blower is our toughest blower yet. It has two 20" augers, 12"X36" fan and a drive line capable of over 200 hp.

Standard features on this blower include 1/2" thick, reinforced fan blades, 3/16" thick fan housing and body, 7/16" thick end plates, 3/4" thick "A" frame and hitch clevis and #80 heavy roller chain for the auger drive.

Hardened and ground gearbox shafts and gears as well as shear-bolt protection on the PTO and auger-drive ensure many hours of trouble-free blowing and with a weight just over 2000 lbs., you know you've got one rigid piece of equipment.

- 108 HDD - OPTIONS**
- Flex Hood
 - Bolt-on cutting edge
 - Wing edges
 - Hydraulic motor for hood turner
 - Electric hydraulic cylinder
 - Truck loading chute
 - Front Mount Kit
 - 1000 rpm
