- OPTIONS -
- Flex Hood**
 - Bolt-on cutting edge**
 - Hydraulic hood turner**
 (standard on 7' and larger)

Our smallest line of blowers come well equipped with many of the same features found on our heavier blowers.

These models all have re-inforced end-plates, 1/2" thick ribbon-style auger-flighting, hardened/ground shafts and gears in the gear-box, 4 blade fans and a rigid clevis-style A-frame hitch. An adjustable deflector on the chute and all greaseable bearings round-out the package to give you years of service.
