

HH Series
 SKIDSTEER MOUNT
 HYDRAULIC DRIVE

| CUTTING WIDTH | AUGER | FAN | WEIGHT (LBS) |
|---------------|-------|-------|--------------|
| 60" | 16" | 24x8" | 660 |
| 72" | 16" | 24x8" | 715 |
| 78" | 16" | 24x8" | 750 |

- HH SERIES - OPTIONS**
- Flex Hood
 - Bolt-on cutting edge
 - Wing edges
 - Hydraulic motor for hood turner
 - Electric-hydraulic cylinder
 - Truck loading chute

Our hydraulic driven snow blowers are available with many options to fit on a wide variety of machinery, with sizes ranging from 4' to 8'. Options include wing edges, bolt-on cutting edges, 12 volt actuators to control hood deflection and rotation.

To maximize the blower's performance, we have at least a dozen different hydraulic motors available to use your hydraulic gallonage and flow to its greatest potential. The Quick-attach hook-up is mounted directly to the back of the fan housing and braced to all four corners of the blower for extra rigidity.
